

LICENSEWARE

**Modern companies can't exist
without software.**

On average enterprises **overspend** more than 30% on software licenses, and are exposed to more than **\$6 M risk** due to licensing non-compliance.

> [Source: Gartner](#)

> **Risk**

Software Audits are very common

> **Cost**

Services and tools are expensive

> **Resources**

Budget and expertise are hard to find

> **Time**

ITAM is time consuming

"Our vision is to make software asset management a commodity for organizations, by reducing complexity and lowering investment cost"

Licenseware is the first open app ecosystem for IT asset management.

- On-demand, modular **apps**
- Pay **only** for what you need, when you need it
- **Zero** deployment SaaS based analysis
- Upload and analyze **different** data sources
- Drag and drop, **simple** to use
- Like **AWS**, for IT asset management

Obtain licensing insights in **minutes**, not **days**

> Upload raw data

> Code analyzes

**Rounded down mean avg. of historical and cloned usage costs per DB found since June 2021

Accenture.

"We're now saving up to **50%** of the time required to finish a large project."

We're not building a tool...

Licenseware Competition

- Specific
 - Modular Apps
 - Community-driven
 - Pay As You Go
 - Data Agnostic
 - Partners Use and Sell
- Generic
 - One-stop Solution
 - Proprietary Only
 - Fixed Terms
 - Fixed Sources
 - Partners Sell

we're building a toolbox.

Partner values

> **Market advantage**

Automating manual analysis significantly increases speed to deliver and lowers overhead, that paired with the lower barrier to entry provided by data agnostic tooling grants a significant and competitive advantage in the market.

> **Consistent accuracy**

Removing human error with highly detailed and accurate analysis via automation ensures high quality customer deliverables on a consistent yet fast and scalable basis.

> **Fast return**

Automating tasks commonly performed by expensive resource on a global scale combined with the commercial advantage and customer values that this automation brings, profit increases considerably in comparison to manual processing.
